General Questions

Practice Questions

Q1. In a team of four, if A can only work with B or C, and D can only work with C, which of the following pairs can work together?
   A. A and D
   B. B and C
   C. C and D
   D. A and C

Solution: A and C can work together as A is willing to work with C.

Q2. In a set of tasks where task Q must be completed before task R, and task S can be done at any time, which of the following is a valid conclusion?
   A. R can start before Q.
   B. S must be completed before Q.
   C. Q must be completed before R, but S can be done anytime.
   D. R must be completed before S.

Solution: Q must be completed before R, while S's timing is not dependent on Q or R.
